

# PROJECT: TONUKE

Tonuki bench is a unique furniture that combines beauty and function. Tonuki is a comfortable place to sit, a perfect cubby to hide wet shoes and a flower pot carefully crafted from natural solid wood. It owes its charm to the beauty of wood. Often not obvious beauty hidden in patterns and colors. Each piece is unique just as unique are different trees and their stories.

Form for Tonuki was invented to show, emphasis and express fully the beauty of wood used for creation. Choosing the right species and color allows Tonuki to fit in different ambientes. Tonuki bench can be crafted from any kind of wood, which makes it suitable for using indoors and outdoors depending on the chosen material. The bench is mostly made out of thin pieces, which makes it possible to use furniture waste in production. This way the whole process is not only cost efficient but also sustainable and zero waste.
